PURCHASED POWER ADJUSTMENT (PPA) CLAUSE

There shall be added to from the monthly electric service billing, a Purchased Power Adjustment or PPA calculated on a per kilowatt-hour basis. The PPA is a combination of two charges. The first are costs associated with operation of the Midwest Independent Transmission System Operator (MISO). MISO's objective is to maximize the efficient use of the transmission system and energy under fluctuating power demands. The second component is fuel and purchased energy, which is based on the fluctuating cost of fuel used in generating stations and power purchased from other energy providers when needed. PPA does not apply to Security Lighting and Non-Metered Load Management Services.
